U. considers changing ‘Ute’ mascot

BY CAMILLA MOORE
Chronicle News Writer

For years the University of Utah has not had a formal mascot, according to vice president of University Relations Ted Capener. Recently a committee was formed to examine the need for a mascot. “We’ve had a ‘symbol’ as opposed to ‘BYU with the logo,’” Capener said.

"We have a symbol — it is a mascot," said Beverly Sutter, Native-American student advisor. "Everyone knows the Crimson Warrior is the mascot. Let’s not use race names. Vice president Capener knows it, the students know it and I know it." Sutter added that she speaks only for herself and no one else at the U.

"The U. has been concerned for years and we’ve made an effort to keep from being offensive," Capener said. "There is still a feeling in some that we should look to make some changes, and we are.

This is a human issue," Sutter said. "It’s an issue of dignity and human respect."

The change was motivated in part by the Native-American uprising against the culturally inexact usage of Native-American symbols, according to Capener.

"There is a feeling that some of what we’ve done, with the Crimson Warrior, insignia, etc., has been offensive," Capener said. "We don’t want to do anything which would appear disrespectful. We hope to come up with a mascot that will be fun and not disrespectful.

It is still a possibility that the Crimson Utes will be a symbol of the U, according to Capener. Over time if the new mascot is accepted, there is a possibility that the mascot will become the symbol.

Sutter feels that the U. needs to go all the way when changing the mascot. "We’re not satisfied to have a new mascot and keep the running Ute as the ‘symbol’ of the U. Half isn’t good enough."

"We are receiving student input, alumni input and faculty and staff input," Capener said.

"I think that we shouldn’t change the mascot," Hugo Vera, music and biology student, said. "Some people tend to take things to the extreme. It’s one thing to be culturally insensitive to Native Americans, but it’s another thing to take pride in our school. Part of that pride is wishing we had characteristics of what the Utes were — strong and proud."

"The results are not conclusive and we are still discussing the possibilities of a new mascot. No decisions have been made and nothing has been seen "mascot" on page two.

Grads can buck trend of unemployment with preparation, research

BY LARA GIFFORD
Chronicle News Writer

Unemployment rates for recent college graduates are up, according to the Department of Labor’s publication, Monthly Labor. The rate of unemployment 16- to 24-year-old men with college degrees rose from 5 percent in 1991 to 8 percent in 1993. The rate for women rose from almost 5 percent to slightly more than 6 percent.

Statistics aren’t available for unemployment rates of graduates of the University of Utah. However, 60 days after 1992 students graduated, it was reported by the Career Information and Placement Center that 80 percent of students did not require their help in finding a job, while 20 percent were available for work.

In the Career Center hopes to give students the edge on the declining job market. With a career library filled with hundreds of volumes furnished by employers all over the nation and books on everything from writing resumes to succeeding at job interviews, students embarking on the job market can receive much valuable information here.

"It is one of the outstanding career libraries in the country. It is an excellent facility," said director of Career Placement Sam Morrison.

Students can also register with the department and meet with counselors who are specialized in specific areas, including technical, engineering, education, business, liberal arts, humanities and fine arts. "The main thing about the center is that each person that comes in is assigned to a specific counselor who knows them and their needs and will help them find a job in the economy that we are in," Morrison explained. Also available is the SIRI computer system, which helps students pick a career of interest to them by asking a variety of questions. Though the library and SIRI is free for all students to use, there is a fee for registering.

U. Hospital sponsors psychiatric seminar

BY AMY KENNEY
Chronicle News Writer

A 10-week seminar concerning schizophrenia and bipolar affective illness is being sponsored by the University of Utah Hospital and Valley Mental Health of Salt Lake in an effort to provide information and support for those affected by the disease as well as for the public.

Schizophrenia is a thought disorder which is believed to be caused by either too much or too little of Dopamine, a neurotransmitter in the brain. Schizophrenia can cause two different types of symptoms. The first type is referred to as positive symptoms, which include hallucinations and delusions. Negative symptoms include lack of motivation or emotion.

Bipolar affective illness, until recently known as manic depression, is a disorder of mood. "Schizophrenia is, it is also caused by an imbalance of chemicals in the brain. People with the disorder experience frequent mood swings, ranging from extremely depressed and suicidal to euphoric."

"One out of four women will experience depression in their lifetime, while only one out of 10 men will have the same experience," Harvey said. "Both illnesses are treatable with medication, but the public needs to be more aware and educated about these diseases, according to the sponsors of the seminar.

Although men and women are affected equally by the diseases, women are more susceptible to depression.

"One out of four women will experience depression in their lifetime, while only one out of 10 men will have the same experience," Harvey said.

Both illnesses are treatable with medication, but the public needs to be more aware and educated about these diseases, according to the sponsors of the seminar.

According to Jan Harvey, an insructor in the seminar, "the euphoria may be a very exaggerated one, well being, or feeling, feeling very powerful, important or some thing they would normally do, perhaps even get in trouble with the law."

U. instructor named top Utah prof. for third year

A University of Utah associate professor of psychology whose students have been known to get homework under their fingernails has been named the 1993 Utah Professor of the Year by the Council for Advancement and Support of Education.

Thomas Malloy, who took 20 U. students to Mexico last year to perform community service, has been recognized as one of the 47 best undergraduate teachers and scholars in the country by the council, an international association of 3,200 colleges, universities and independent grade schools.

His selection marks the third year in a row that a U. faculty member has received this prestigious award for the state of Utah. Anne Roadman, an associate professor of modern dance, received the award last year. Jackson Newell, professor of educational administration, was selected in 1991.

According to U. President Arthur Smith, "Professor Malloy represents, along with his two predecessor award winners, Professors Roadman and Newell, the deep commitment of the University of Utah"s faculty to outstanding undergraduate teaching. His dedication to his students is truly extraordinary."

Malloy, who has been at the U. since 1968 and whose scientific research involves how people learn, called the month-long Mexico trip, which was cited by the council as one of the reasons he received the award, "a transformational journey" in the students' learning process. "The students were forced to take a very different point of view and re-experience life in a fresh way," Malloy said, adding that he will take a second group to Mexico this coming winter.

The students laid bricks, mixed cement, participated in an extensive environmental clean-up project and performed other manual labor in and around Guanajuato, located about 30 miles south of Mexico City.

Although community service might appear an unusual way to learn about psychology, Malloy said, human learning is enhanced by the more positive view of life that a person has.

"Being forced to take a very different point of view triggers a jump in a person's knowledge base because it provides another description of that person's world," he said.

Criteria for the council's award included extraordinary commitment to teaching, service to the institution and the profession, balance of achievement in teaching, scholarship and service, involvement with students and achievement by former students.

Civil engineering student takes third in competition

A small water turbine designed and built by a University of Utah student placed third in the open division unrestricted class at the 1993 Hydro Power Contest in Nashville.

Rick Garrett, civil engineering student, was one of the most active participants in the contest, according to Hydro Review magazine. In addition to the two turbine entries he designed, built and tested, Garrett also tested a turbine for three other classmates who were not able to attend the conference.

The third place finish earned Garrett a $250 cash award.

The primary aim of the contest, held during the Waterpower '93 Conference in August, was to stimulate and broaden interest in hydropower as a clean, renewable, and environmentally sound way of generating electricity. More than 30 individuals throughout North America competed in the contest.

Entrants built devices that would convert a specific water flow into power, enough to lift a one-kilogram weight three meters. The contestants whose device lifted the weight the fastest were declared winners.

An efficiency division measured liters of water used to move the weight. In that division, the entry using the least amount of water was declared the winner.

Garrett competed in the student division undergraduate class with classmates Paul Wemer.

Gladysz receives award from chemistry society

John Gladysz, University of Utah professor of chemistry, was selected to receive one of the nation's highest awards for research in chemistry.

The award was established by Dow Chemical Society to recognize major advances in research in organometallic chemistry. Gladysz was named winner of the 1994 American Chemistry Society Award in Organometallic Chemistry at the society's annual meeting.

Gladysz has been a member of the faculty since 1982 and is the 15th winner of the award and the first from a Western state other than California. He will officially receive the award next March in San Diego.

mascot
from page one decided," Cayman said about the committee.

At the committee meetings, several justifications for keeping the Crimson Warrior arose, according to Suttee:

Economics: The committee is concerned about losing student support, as well as losing money by not using old l-gou, insignia.

"Thank you. The committee feels that because the Utes has been the mascot for so long, it's a tradition that needs to be carried on.

Honor: People seem to think that they honor Native Americans when they make them mascots.

Suttee sees problems with all of these justifications, but feels the most disturbing and perplexing of these is the idea that the Utes are being honored.

"At the last meeting I was invited to, I asked everyone, 'Why do you honor the Utes?'—and no one answered," Suttee said.

"This is not an honor. If the U. wants to honor the Utes, they need to change their mascot. They should also acknowledge that the land the U. is sitting on was taken from the Utes by the pioneers. If the U. truly wants to honor the Utes, they should set up scholarships for them," Suttee added.

Special two-pant suit values

(Ad for clothing)

Men's classic two-pant suits

Offering one of the best assortments of quality two-pant suits in the Intermountain West, our collection includes durable wool-blend suits in regular or athletic cuts in single- and double-breasted styles. Mens Suits

Reg. $300 Single-breasted suit in stripes $219.50
Reg. $395 Double-breasted suit in stripes or plaids $279.50

Add $10 for sizes 48 and up, plus extra longs.

Van Heusen white dress shirts

Reg. $27 Classic dress shirts of polyester/cotton broadcloth; single-needle tailoring in full and fitted cuts. Mens Suits

Reg. $25 Short-sleeved broadcloth dress shirts $19.99
Reg. $25 White long-sleeved oxford and white-on-white shirts $21.99

Also, full-time missionaries receive an additional 10% discount on mission-related purchases.
